

CST Bulletin – March 13, 2024

Update – Inactivation of Vancomycin - Pharmacy to Dose (Module)

AFFECTED APPLICATION(S)	PowerChart: PowerPlan
AFFECTED AREA(S)	Live Sites
NET NEW, OR UPDATE TO EXISTING BUILD	Update to Existing Build

What is Changing?

BACKGROUND: The **Vancomycin - Pharmacy to Dose (Module)** will be inactivated as of MMM DD, YYYY. Providers may order vancomycin IV via the **Vancomycin Empiric Dosing (Module)**, with a preselected Pharmacy Consult for pharmacist to assess vancomycin IV dosing and perform therapeutic drug monitoring as indicated. The **Vancomycin Empiric Dosing (Module)** reflects the latest VCH-PHC vancomycin empiric dosing guidelines (5th edition). Click on the notebook icon within the PowerPlan to link to the dosing nomogram guideline.

UPDATE:

- **Vancomycin - Pharmacy to Dose (Module)** – inactivated

As of MMM DD, YYYY

Vancomycin Empiric Dosing (Module)
